

CTF BIANNUAL TRACKING SURVEY

CTF/FCE

January 2024

Methodology

- Sample size: 2,000 adult Canadians.
- Survey field dates: January 15-24, 2024.
- The data was weighted by age, gender, education and region.
- Totals may not add up to 100 due to rounding.
- The margin of error for a comparable probability-based random sample of the same size is +/- 2.2%, 19 times out of 20.

Key Findings

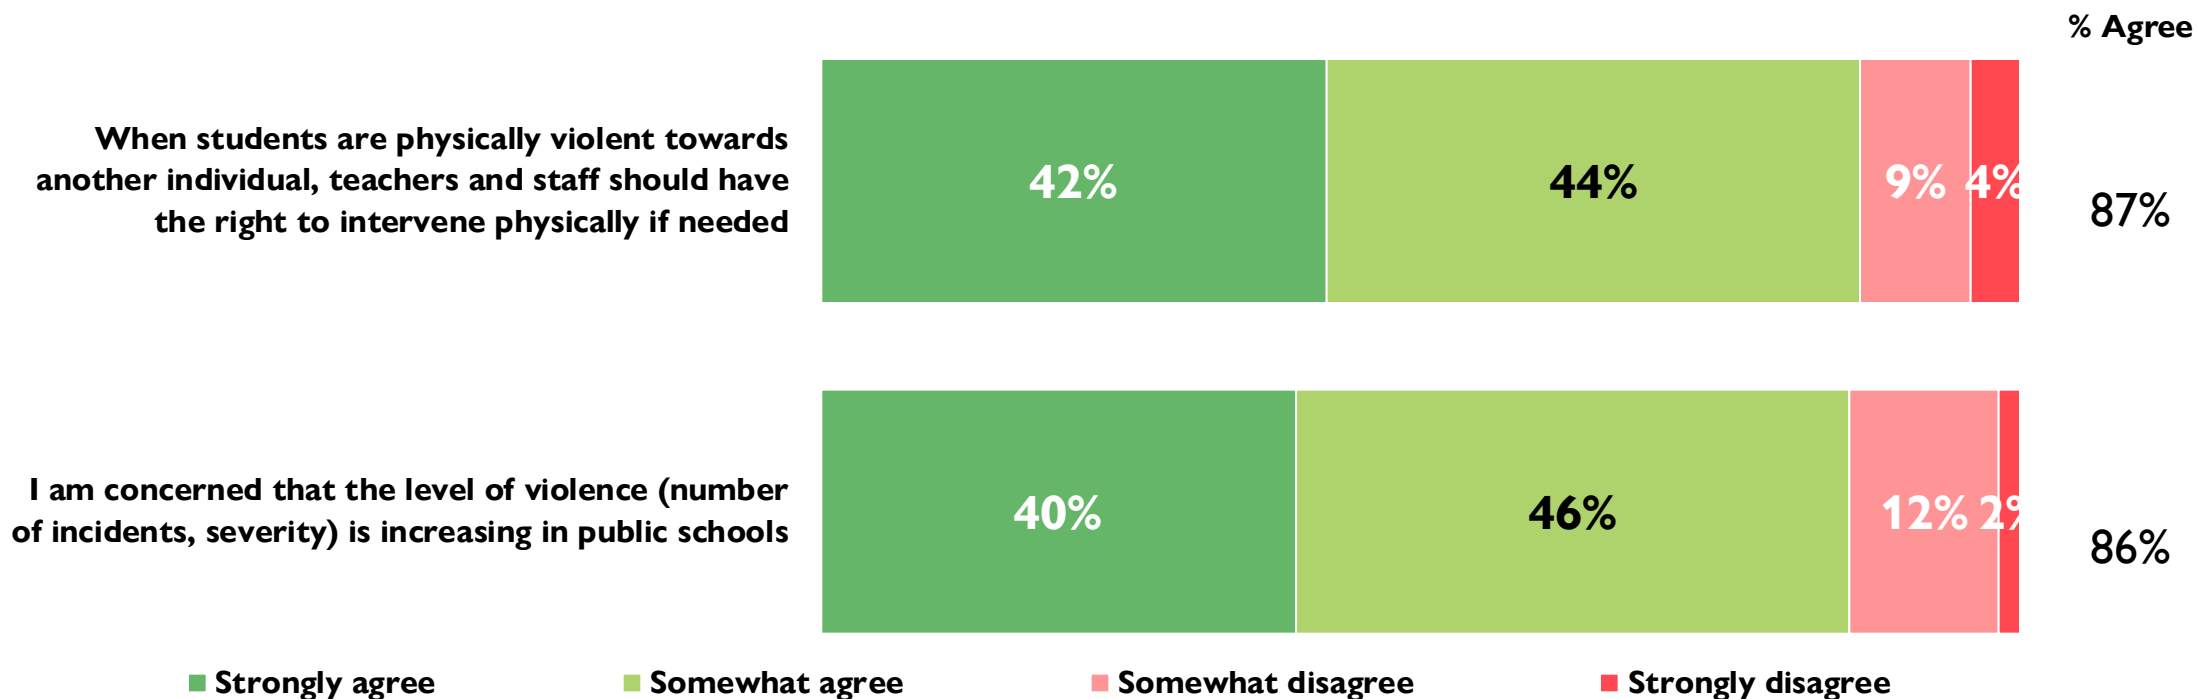

Violence in schools:

- With increased reports of violence in schools across Canada, a strong majority (86%) have concerns about the rising levels of violence in schools and believe teachers should have the right to physically intervene in specific situations (87%). A strong majority of parents support teacher and staff interventions. Men (91%) are more likely to support teacher intervention than women (83%).

Do you agree or disagree with the following statements:

Parents and Canadians are concerned about violence in schools and are in support of empowering teachers to take action when needed

Like the majority of Canadians, parents (including those of children under 18) are increasingly concerned about violence in schools and support allowing teachers and staff to physically intervene when needed. NDP voters are least supportive of teacher intervention, though still the majority are in support.

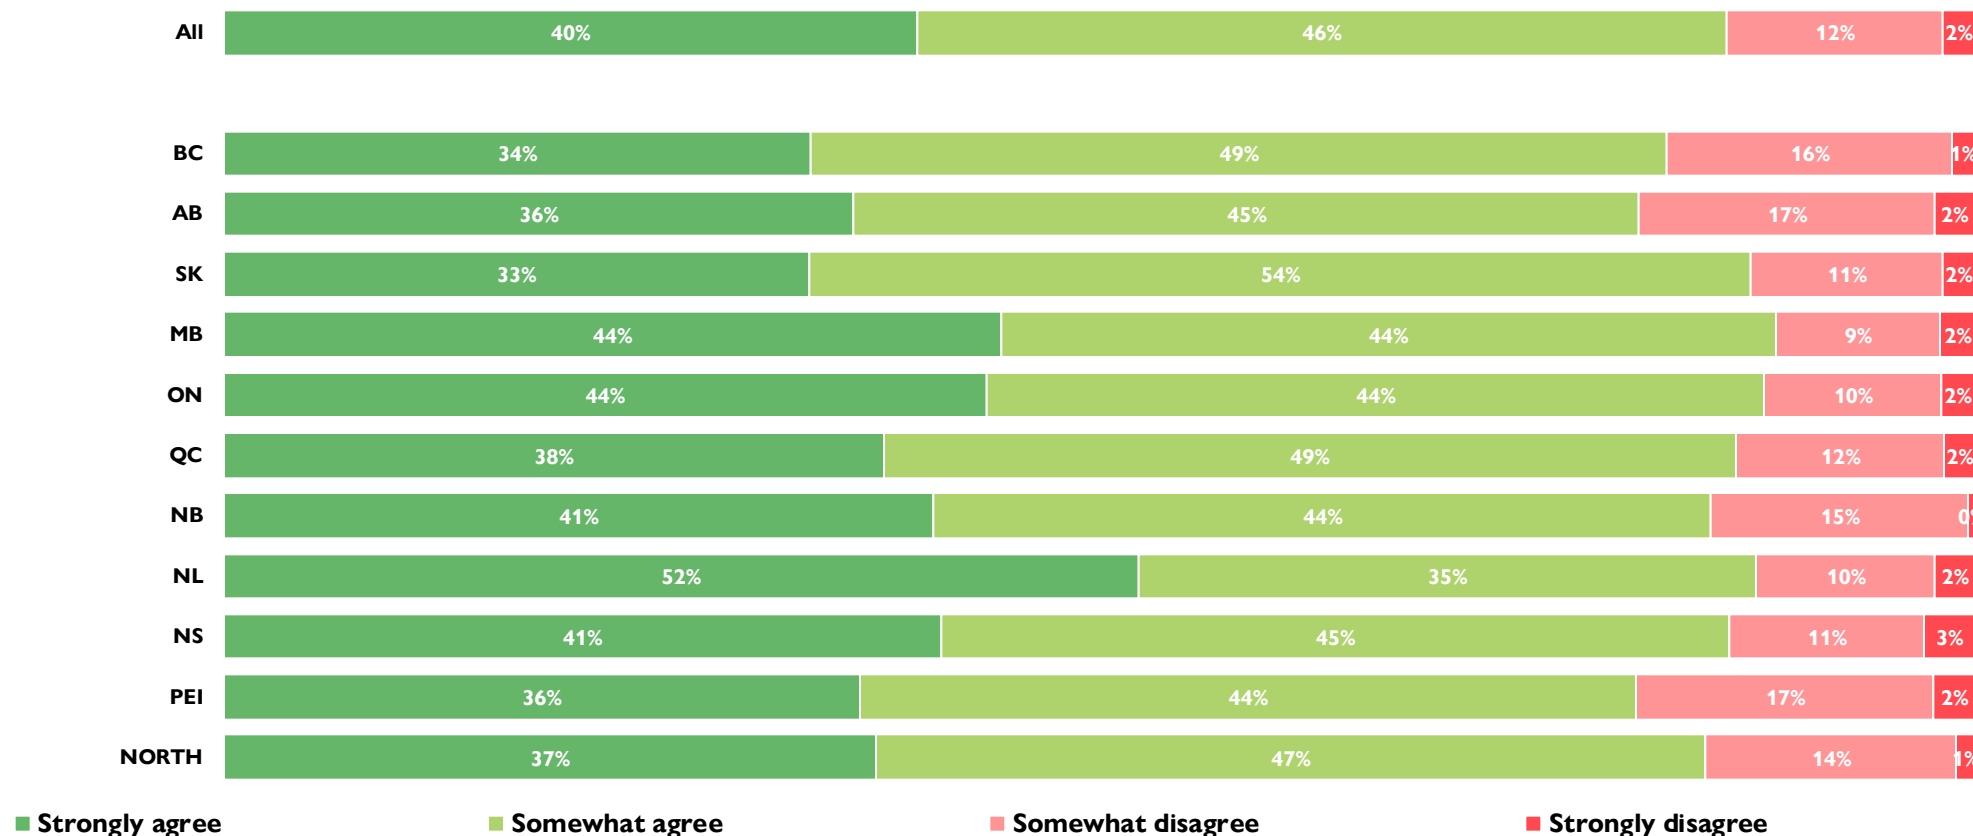

Appendix

Do you agree or disagree with the following statements:

I am concerned that the level of violence (number of incidents, severity) is increasing in public schools

REGION

All | n=2,000

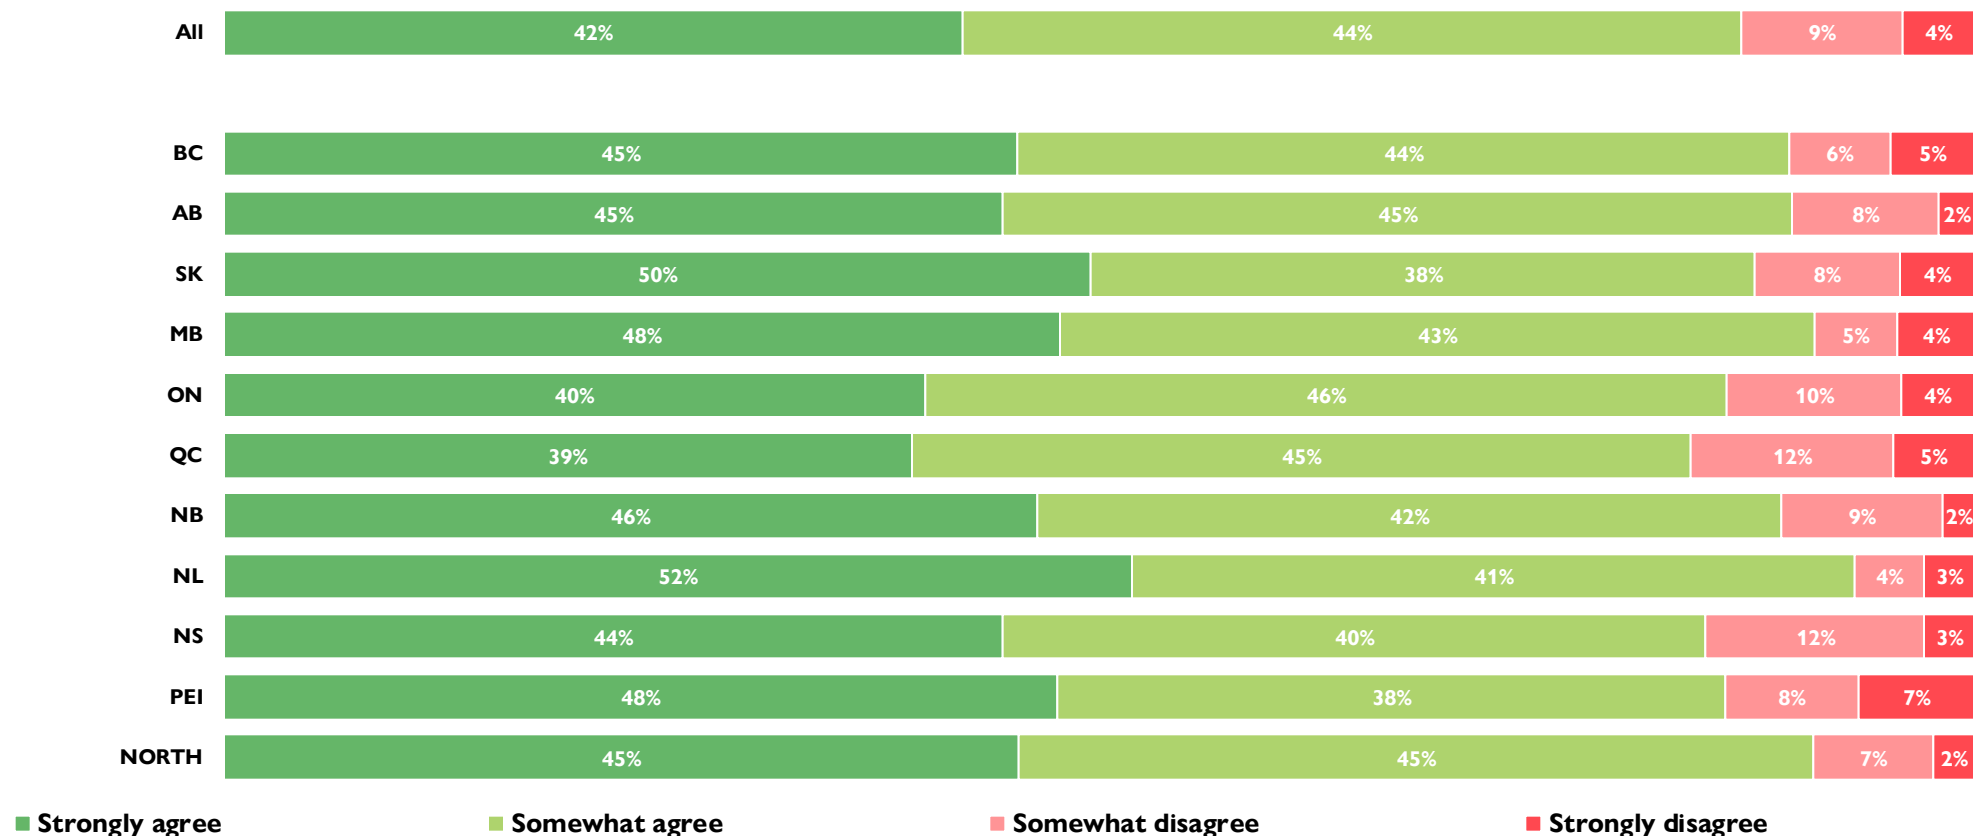

Do you agree or disagree with the following statements:

When students are physically violent towards another individual, teachers and staff should have the right to intervene physically if needed

REGION

All | n=2,000
